Fees Collected by the BitShares Blockchain through March 2017

Taconator

1 Introduction

The BitShares 2.0 blockchain has been collecting fees for various operations since its inception on October 13, 2015. There are 45 types of operations available on the blockchain including account operations, asset operations, transfers operations, market operations, etc.

This document reports on the various fees that have been collected on the blockchain from the blockchain's inception through March 2017. Note that these collected fees are subsequently distributed to different stakeholders during maintenance intervals. Furthermore, these fees are distributed according to dynamic parameters that are specified by stakeholders, committee members, asset issuers, and the type of account that is paying for the operational fee. To reiterate, the fees reported in this document are merely the fees collected by the blockchain network and which are later distributed to various accounts. These fees are a superset of the fees that are ultimately distributed to the network's fee pool. In addition, this document does not report on the volume of activities on the blockchain; rather it is focused on the fees collected as a result of the activities. Finally, this document does not report on the subsequent distribution of the collected fees to entities such as the network, witnesses, worker proposals, asset issuers, referrers, nor lifetime member accounts.

Every operation that occurs on the network has an associated fee that may be paid for with any asset that is available on the network. The quantities that are reported in this document are all reported in terms of the asset units that were specified for fee payment (e.g. BTS, bitGold, etc.) and are not expressed in terms of any common asset unit.

2 Summary

The total fees collected by the Bitshares Network since October 2017 through March 2017 are reported in the Appendices. Appendix A lists the nominal fees collected for every operation. Appendix B lists the fees for every operation as a percentage of the total fees collected in each asset. The latter Appendix can be helpful for quickly identifying the distribution of fees across operation types.

Fees were collected in 349 assets. The total fees collected in the core asset, BTS, are 47,106,798 BTS. During that timespan, the distribution of operations contributing towards those BTS fees are shown in Table 1. The top three sources of generated fees are asset creation, account

upgrades (e.g. from standard membership to lifetime membership), and account creation.

Table 1. The distribution of collected BTS fees across all types of operations from 2015-10 through 2017-03 (rounded to the nearest integer)

Operation	Total (BTS)
Asset Create	48%
Account Upgrades	26%
Account Create	17%
Limit Order Create	3%
Transfer Operation	2%
Asset Publish Feed	1%
Vesting Balance Withdrawal	1%
All others	0%

3 Acknowledgments

The author is grateful to xeroc for feedback regarding the presentation of the various results. Any possible errors in this document are those of the author alone.

¹ However, it has been observed that most fees are paid with the blockchain's core asset, BTS.

Appendix A: Fees Collected in Nominal Terms

This appendix reports only on operations for which a fee was collected. The values reported are the nominal values for each asset.

Fees Collected All-Time

Table 2. Fees collected by the blockchain from 2015-11 through 2017-03 for transfer operation

Appendix B: Fees Collected in Percentage Terms

This appendix reports on the same data that is reported on Appendix A except presented in percentage terms of the total fees collected for an asset. This format can be helpful for inspecting the distribution of fees across all operation types.

Fees Collected All-Time
